The following alert symbol is used in this manual.

Alert Statements
WARNING
injury or death
Do not put the actuator close to the switch when the

## Precautions for Safe Use

D40Z rom power supply when wiring D40z. Failure do so may
D40Z.
(2) Do not operate D40Z with flammable or explosive gas.
(3) Incorrect wiring may lead to loss of safety function. Wire
conductors correctly and verify the operation of D4OZ befor the system in which D 40 Z is incorporated Auxiliary monitoring output is NOT safety auxiliary monitoring output individually for any safety function. Sus incorrect use causes loss of safety functions of D40Z and its relevant systems.
(5) After installation of
(5) After installation of D40Z, qualified personnel should verify to see that the installation, inspection, and maintenance are properly
performed. The qualified personnel should be qualified and performed. The qualified personnel should be quaified and
authorized to secure the safety on each phases of design, installation, running, maintenance and disposal of system.
(6) Qualified personnel, who are familiar to the machine in which D40Z is to be installed, should conduct and verify the installation (7) Be sure to inspect D40Z daily and every 6 months. Otherwise serious injury may possibly occur due to a system malfunction.
(8) Do not dismantle, repair, or modify D40Z. Doing so may lead to
loss of its safety functions.
(9) Do not apply DC voltages exceeding the rated voltages, nor any AC voltages to D40Z.
(10) Use a DC supply satisfying the requirements given below to
prevent electric shock.
example, according to IEC/EN 60950 or EN 50178 , or a
transformer according to IEC/EN 61558.
limited voltage/current circuits stated in UL 508 .
(11) Use only appropriate components or devices complying with
relevant safety standards corresponding to the required relevant safety standards corresponding to the require performance level and safety category. Conformity to requirements of the performance level and safety category must a certification body regarding assessment of conformity to the required safety level.

## Precautions for Correct Use

(1) Always use D40Z with dedicated actuator and dedicated controller to comply with the requirements of EN ISO 13849-1
(2) Handle with care

Do not drop D40Z to the ground or expose to excessive vibration or (3) Conditions of storage and usage
Do not store or use D40Z under the following conditions. Doing so 1) In direct sunlight

1) In direct sunlight
2) At ambient temperatures out of the range of -10 to $+65^{\circ} \mathrm{C}$
3) At relative humidities out of the range of $25 \%$ to $85 \%$ or under
such temperature change that causes condensation.
4) In corrosive or combustible gases
5) Under splashing of oil or chemicals
6) In the atmosphere containing dust salin
7) Where steel scrap or metal powder may fall directly to D40Z.
(4) Do not use D40Z at altitudes over 1,000 meters
(5) Do not use to connec
conductors of D40Z.
(6) Disconnect $D 40 Z$ and the controller connected to $D 40 Z$ from power supply when replacing D40Z. Failure to do so may cause unexpected operation of devices connected to D40Z
(7) Keep D40Z from solvent such as alcohol, thinner, trichloroethane or
gasoline. Such solvents make the marking on D40Z illegible and cause deterioration of parts.
(8) Do not use D40Z in the magnetic
(9) Do not use D40Z in the water or continuous water exposure
environment, otherwise water may leak into D40Z. (An enclosure o
IP67 rating, which D $40 Z$ is rated IP67 rating, which D40Z is rated, protects against temporary
immersion in water.) immersion in water.)
(10) Do not use D40Z sw
protect the switch and the actuator. Keep a distance of at least 1 mm between the switch and the actuato
(11) Be sure to install D40Z switch and actuator in such as appropriate

## 7a T F

(12) When installing two or more adjacent switches, keep a distance

(13) Be sure that the machine is stopped whenever the guard door

(14) Installing the switch and actuator on a metallic material may affect the operating distance. In addition, any instruments nearby that generate strong radio waves or magnetic fields may affect the operating distance via the
metal. Do not install the switch and actuator directly on a metallic material. metal. Do not instal the switch and actuator directly on a metalilic material. on the operating distance before use. Reference values for the effects of installation on a metallic material.

\section*{| Operating distance |
| :--- |
| Approximately $75 \%$ of the original value |
| Approximately $85 \%$ of the original value |}

It is recommended that the switch and actuator unit be separated
at least 10 mm from any metal parts or metallic materials. at least 10 mm from any metal parts or metallic materials. (15) Use M4 screws and washers to install the switch and actuator. Tighten the screws with a specified torque. After installing and
commissioning, coat the switch-actuator fixing screws with tamper-proof varnish or similar compound for locking. Using anaerobic locking compounds can have a detrimental effect on the plastic switch case if the compounds contact with the switch case,
6) Wiring:

-Stranded wire: the following sizes to wire D40Z:
to $2.5 \mathrm{~mm}^{2}$
AWG24 to AWG12 -Solid wire: 0.2 to $2.5 \mathrm{~mm}^{2}$ AWG24 to AWG12 2. When not using auxiliary output, cut off the unused conductors and protect by insulating-taping to prevent contacting with other terminals. 3. When you use an additional cable of 20 m or longer, use a blue lines together.
(17) Use cables of a total length of 100 m max. to connect multiple depending on the number of D40Z switches connected. The supply voltage to D 4 Z may decrease by the voltage drop depending on the cable or the wiring configuration Check the
 G9SX-NS202 G9SX-NS202 G9SX-NSA222 G9SX-NS202
G9SX-NSA222 Note. The wiring length between the products must be 100 m max. radio interference, in which case the user may be required to take adequate measures to reduce interference.
(19) D40Z may not function properly in surrounding environment with strong lectromagnetic equipment such as RFID system, proximity sensor, motor inverter, and switching power supply. If you use D40Z near such equipment be sure to verify effects of such equipment on D40Z before using.
(20) Handle cables with care.

For bending cables, it is recommended to bend them with a radius of bend no less than six times the cable outer diameter. ) To determine satety distance to hazards, take into account the delay of non-contact door switch output caused the response time (22) If there is any machine that has a large surge current (e.g., a motor) near D40Z, connect a surge absorber to D 402 between the blue and the other cables (white, black, and brown), respectively, and between the yellow and the gray cables. Suggested surge absorber's specification is as follows (Per IEC61000-4-5(surge immunity))
Breakdown voltage: $27-33 \mathrm{~V}$
1 Detection Ranges (Typical data)

Note1. Operating distancance means the
between the switch and actuator Above graph is only for reference temperature at $23^{\circ} \mathrm{C}$.
Actual operating distance may vary depending on the
surrounding metals or temperature.
te3. Surfaces other than the sensing surfaces of the switch and actuator may activate the detection. Be sure to install the switch
and actuator so that the sensing surfaces oppose one another,
2 Switch and actuator operation

When using the operating direction along the sensing surface,
be sure to install the switch and actuator so as not to be affecte
When using the o
be sure to install

## Ratings and Specifications

| - Ratings |  |
| :--- | :--- |
| Item | D40Z-1CD |
| Supply voltage | $24 \mathrm{VDC}+10 \% /-15 \%$ |
| Power consumption (Note 1 ) | 0.5 W max. |
| Auxiliary output | Photocoupler output <br> 24VDC Load current: 10 mA |
| Specification and Performance |  |

I Safety Categories D4OZ can achieve the corresponding performance levels and
categories up to PLe and Category 4 per EN ISO 13849-1 by
the combined use with the controller G9SX-NSD the combined use with the controller G9SX-NSD.
Note that the performance levels and categories are based on Note that the performance levels and categories are based
the example circuits that we recommend. This does NOT
mean that the combination of D40Z and G9SX-NSप can always achieve the performance levels and categories under all the similar conditions and situations.
UL does not provide UL certification for UL does not provide UL certification for any functional safety
rating or aspects of the D40Z device. Conformity to the performance levels and categories must be
assessed as a whole system. When using D40Z and assessed as a whole system. When using D40Z and
G9SX-NS $\square$ for performance levels and safety categories,

Inspection / Maintenance

## - Daily inspection: 1. Check every guard door to see that machine stops <br> 1. Check every guard door to when guard door is opened

- 6-month inspection

1. Isolate all power.
2. Isolate all power.
3. Check the switch and actuator for proper alignment.
4. Check terminals for proper connectiong for signs of damage.
5. Before resuming normal machine operation,
check every guard door to see that machine stops
4 Dimensions

| Vibration resistance | Frequency: 10 to <br> Amplitude: 0.75 mi <br> Mechanical shock resistance <br> $300 \mathrm{~m} / \mathrm{s}^{2}$ Min. $\mathbf{} \mathbf{~}$ |

|  | brown | Signal Name | Color of Conductor | Description of Operation |
| :---: | :---: | :---: | :---: | :---: |
|  | blue | Non-contact door switch power input | Brown | Power supply for D40Z |
|  | white |  | Blue |  |
|  | black | Non-contact door switch signal input | White | To set non-contact door switch output in ON state, non-contact door switch signal input must be in ON state. |
|  |  | Non-contact door switch Output | Black | Output status depends on statuses of actuator and non-contact door switch signal input |
|  |  | Auxiliary monitoring Output | Yellow | Output status depends on status of actuator. |
|  |  |  | Gray | When a fault is detected, turns into OFF state regardless of actuator status. |

| Troubleshooting |  |  |
| :---: | :---: | :---: |
| LED indicator |  | Causes and Corrective Action (Note 1) |
| $\stackrel{\ominus}{\bullet} \stackrel{\ominus}{2}$ | Fault in power supply Input (brown/blue) | Power supply input may be improperly wired. Check and correct wiring of brown and blue lines. Refer to Section 5. Connection Examples. |
|  |  | Power supply to D40Z may be insufficient. <br> Check the power-supply voltage of D40Z fills ratings. Refer to Section 3. Ratings and Specification. |
|  |  | The wiring length or size of the wire may not be to the specification. Check the wiring length and size of the wire. Refer to Precautions for Correct Use. |
| $\begin{aligned} & \text { Red continuously } \\ & \text { blinking } \end{aligned}$ | Noise or D40Z failure | There may be excessive noise. Check and correct ambient noise environment. |
|  |  | There may be a failure in internal circuit. Replace with a new D40Z. |
|  | Fault in power supply Input (brown/blue) | Power supply to D40Z may be insufficient. <br> Check the power-supply voltage of D40Z fills ratings. Refer to Section 3. Ratings and Specification. |
|  |  | The wiring length or size of the wire may not be to the specification. Check the wiring length and size of the wire. Refer to Precautions for Correct Use. |
| Red blinks once for 2s | Fault in Non-contact door switch output (black) | Black line may be shorted to other line. Check and correct wiring of black line if the black line is shorted to other lines. Refer to Section 5. Connection Examples. |
| Red blinks twice for 2 s | Sensing fault | Invalid actuator may be in a close range to switch. Use the dedicated actuator. |
| Red blinks thrice for 2s | Fault in Non-contact door switch signal input (white) | Faulty signal may be input to white line. Check and correct wiring of white line. Refer to Section 5. Connection Examples. |
| - <br> Yellow Blinking | OFF state of another D40Z | Another D40Z may be in OFF state. <br> Check status of another D40Z connected to the white line and the wiring <br> Refer to Section 2. Switch and actuator operation and Section 5. Connection Examples. |
|  | Fault in Non-contact door switch signal input (white) | White line may be disconnected. Check and correct wiring of white line. Refer to Section 5. Connection Examples. |
| $\stackrel{O}{\text { Red Solid-ON (Note 2) }}$ | Actuator fault | There may be a failure in actuator. Replace with a new D40Z. |
| $\begin{aligned} & \bigcirc \\ & \text { Yellow Solid-ON } \\ & \text { (Note 3) } \end{aligned}$ | Fault in Non-contact door switch signal input (white) | White line connected to D1 terminal of G9SX-NSD may be shorted to other line. Check and correct wiring of white line connected to D1 terminal of G9SX-NS $\square$ if the white line is shorted to other lines. Refer to Section 5. Connection Examples. |
|  | Fault in Non-contact door switch output (black) | Black line connected to D2 terminal of G9SX-NSD may be disconnected. Check and correct wiring of black line connected to D2 terminal of G9SX-NSロ. Refer to Section 5. Connection Examples. |

Yet another possible cause is excessive noise. In this case, check and correct ambient noise environment.
Note2. The case where the guard door is closed (Switch detects actuator) is indicated.
