Practices Guide

V426-E1-02

Introduction

This guide provides reference information on editing pages of the NA. It does not provide safety information.

Be sure to obtain the NA-series Programmable Terminal User's Manuals, read and understand the safety points and other information required for use, and test sufficiently before actually using the equipment.

Terms and Conditions Agreement

Warranty, Limitations of Liability

Warranties

Exclusive Warranty

Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.

Limitations

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right.

Buyer Remedy

Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See http://www.omron.com/global/ or contact your Omron representative for published information.

Limitation on Liability; Etc

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Application Considerations

Suitability of Use

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Disclaimers

Performance Data

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

The following manuals are related to this manual.

1 Introduction

In this chapter, you will learn what information is required to create the pages on the NA-series PTs while confirming the contents included in this guide. You will also learn the system configuration required and the procedure for creating pages.

1-1 Overview

1-1-1 Overview

As summarized below, this guide explains the multi-language function of the NA-series PTs.

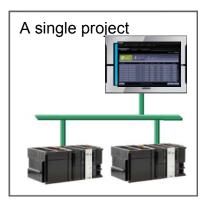

- 1 . NA-series Multi-language Function
- 2 . Resource Settings
- 3 . Switching Among Multiple Languages

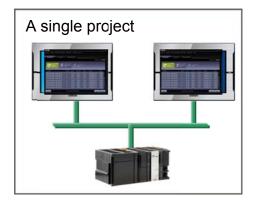

1-2 System Configuration

1-2-1 System Configuration

The NA series can include multiple NJ units or NA units within a single project as shown in the figures below.

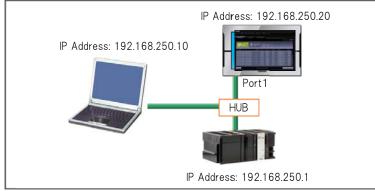

This guide deals with the projects for the NJ-NA configurations as shown below.

The figure below shows the configuration used in this guide.

The Ethernet is used for communications between the NJ series and NA series, as well as for the screen data transfer from the PC.

2 Multi-language Function

2-1 Multi-language Function of the NA Series

Read this subsection while referring to the NA Training (multi-language) sample project.

2-1-1 Project Language and System Language

There are two language settings on the HMI.

Project Language

The project language is displayed for the projects that you create.

System Language

The system language is displayed for the System Menu and for error messages displayed by the system.

The two language settings are managed as pairs. If you change the project language, the paired system language will also change.

2-1-2 Language Setting Procedure

Double-click [Language Settings] under [Configurations and Setup] in the Multiview Explorer. The Language Settings Tab Page is displayed in the Edit Pane.

A, Lan	nguage Settings 🗙			
Defaul	lt language			
	Project Languages	System Languages	Software Keypads	Transfer to Device
Japa	anese (Japan)	Japanese (Japan)	Standard	
Other	r languages			
	Project Languages	System Languages	Software Keypads	Transfer to Device
-	+ 15			

ltem	Description
Default language	Sets the language that is displayed by default.
Other languages	Sets the languages to add in addition to the default languages.
System languages	Sets the language to display system menus or system error messages.
Software keypads	Sets whether to use the default system keypad or a custom keypad.

2-1-3 Changing the Language Settings

Change the language settings as described below:

1. Change the Default language to "English (United States)".

2. Click the 📕 button (to add) at the left bottom of "Other Languages".

· · · ·		
System Languages	Software Keypads	Transfer to Device
System Languages	Sortware Keypaos	
	System Languages	

3. "English (United States)" is now added to the column of the System Languages. The Project Languages column shows "Select Language". Click the arrowhead to the right.

er languages			
Project Languages	System Languages	Software Keypads	Transfer to Device
< Select Language > 🔻	English (United States)	Standard	

4. A list of languages appears. Select "Japanese (Japan)".

efault language			
Project Languages	System Languages	Software Keypads	Transfer to Device
English (United States)	English (United States)	Standard	
Light (critics status)	English (Onited States)		
	English (onited states)		
Other languages Project Languages	System Languages	Software Keypads	Transfer to Device

2-2 Setting Up Resources

2-2-1 Resources

Resources are the text strings, movies, still images, and documents that are displayed for objects and alarms on user pages.

You can use Resources to manage all of the text strings, images, files, and other resources that you use in a project.

For multi-language projects, you can set resources for each project language.

2-2-2 Setting Up Resources

Double-click [HMI]-[Resources]-[Root] in the Multiview Explorer. The resources are displayed in the Edit Pane.

A Language		^{oot x} eral String	gs		•
	Name	Resource ID	English (United States)	Japanese (Japan)	
	String0	String0	Momentary Button		<u>^</u>
ABC KD	String1	String1	Momentary Button On		
	String2	String2	START		
	String3	String3	STOP		
í 🗉	String4	String4	RJN		
	String5	String5	Machine Monitor		
	String6	String6	Setting		
4-	String7	String7	Gauge		
	String8	String8	Alarm		
	String9	String9	Button		
	String10	String10	Data Display		
THE R	String11	String11	Data Input		~
	+ 🖞 🔓	đ			

The text strings that are used in the objects of the project are displayed in the "English

(United States)" column in the *General Strings*" table.

· Selecting the "Alarm Strings" icon (the second one from the top) displays the alarm messages registered in the user alarm settings for the project.

🗛 Language Se	ettings 💭 R	cot X			-
ABC	🔩 Aları	n Strings			
	Name	Resource ID	English (United States)	Japanese (Japan)	
	AString0	AString0	Battery voltage is low		
ABC	AString1	AString1	No work exists.		

For the multi-language settings of the NA series, you are to add to the aforementioned "General Strings" and "Alarm Strings" the text strings of the project language that has been added to the language settings as described in Subsection "2-1-3 Changing the Language Settings". In the above example, the text strings of "Japanese (Japan) are to be added".

2-2-3 Adding the Multi-language Text Strings

This subsection describes the procedure to add multi-language strings to "General Strings" and "Alarm Strings" in the Resource.

There are three procedures to add multi-language strings as described below.

🗛 Languag	ge Settings 🛛 🔀 R	oot X			-
ABC	Gene	eral String	<u>js</u>		
	Name	Resource ID	English (United States)	Japanese (Japan)	
	String0	String0	Momentary Button	Momentary Button	
ABC	String1	String1	Momentary Button On	Momentary Button On	
	String2	String2	START	START	
	String3	String3	STOP	STOP	
	String4	String4	RUN	RUN	
1.00	String5	String5	Machine Monitor	装置モニタ	
	String6	String6	Setting		
	String7	String7	Caugo		

1. Entering directly the multi-language strings in Resource

2. Adding the multi-language strings via an Excel file with the use of the import/export function

ABC	📶 🗍 🜆 General Strings								
	Name	Resource ID	English (United States)	Japanese (Japan)					
	String0	String0	Momentary Button	Momentary Button	<u>^</u>				
3BA	String1	String1	Momentary Button On						
	String2	String2	START						
	String3	String3	STOP						
	String4	String4	RUN						
	String5	String5	Machine Monitor						
~	String6	String6	Setting						
10	String7	String7	Gauge						
A	String8	String8	Alarm						
	String9	String9	Button						
	String10	String10	Data Display						
	String11	String11	Data Input		~				

- 1) Click the third (export) button from the left at the left bottom of the Resources to save an Excel file (Translation.xlsx.).
- 2) Open the saved Excel file and enter in "Japanese (Japan)" Column C the Japanese text strings corresponding to the English. Then, save the file.

	A	B	C	D
1	Name	English (United States) [en-US]	Japanese (Japan) [ja-JP]	
2	String0	Momentary Button	Momentary Button	
3	String1	Momentary Button On	Momentary Button On	
4	String2	START	Start	
5	String3	STOP	STOP	
6	String4	RUN	RUN	
7	String5	Machine Monitor	装置モニタ	
8	String6	Setting	設定画面	
9	String7	Gauge	ゲージ画面	
10	String8	Alarm	アラーム画面	
11	String9	Button	Button	
12	String10	Data Display	データ表示	
13	String11	Data Input	データ入力	
14	String12	Date and Time[Message Priority Group	Date and Time MessagePriority Group	

3) Click the (import) button to the right of the export button to import in the "Japanese (Japan)" column of the Resources the Japanese text strings entered in the Excel file.

ABC	Gene	eral String	gs		
_	Name	Resource ID	English (United States)	J∂panese (Japan)	1
	String0	String0	Momentary Button	Momentary Button	
ABC	String1	String1	Momentary Button On	Momentary Button On	
	String2	String2	START	Start	
	String3	String3	STCP	STOP	
1	String4	String4	RUN	RUN	
	String5	String5	Machine Monitor	装置モニタ	
	String6	String6	Setting	設定画面	
-	String7	String7	Gauge	ゲージ画面	
A	String8	String8	Alarm	アラーム画面	
	String9	String9	Button	Button	
	String10	String10	Data Display	データ表示	
in l	String11	String11	Data Input	データ入力	

4) For the Alarm Strings, as is the case with the General Strings, enter the multi-language strings via the Excel file with the use of the import/export function.

Root X					•
ABC	📊 Alarm	n Strings	ł.		
	Name	Resource ID	English (United States)	Japanese (Japan)	
	AString0	AString0	Battery voltage is low	バッテリの電圧が低下しています。	
ABC	AString1	AString1	No work exists.	ワークがありません。	
	+ 0 %	6P			

5) The function of switching among multiple languages switches the text strings registered in the Resources as shown above.

3. Copying and pasting the text data of the exported Excel file

This procedure is useful when adding or modifying only the single-language data.

1) Click the third (export) button from the left at the left bottom of the Resources to save an Excel file (Translation.xlsx.).

2) Open the saved Excel file and enter in "Japanese (Japan)" Column C the Japanese text strings corresponding to the English. Then, copy the cells to paste from.

12	A	B	C
1	Name	English (United States) [en-US]	Japanese (Japan) [ia-JP]
2	String0	Momentary Button	Momentary Button
3	String1	Momentary Button On	Momentary Button On
4	String2	START	Start
5	String3	STOP	STOP
6	String4	RUN	RUN
7	\$tring5	Machine Monitor	装置モニタ
8	String6	Setting	設定画面
9	String7	Gauge	ゲージ画面
10	String8	Alarm	アラーム画面
11	String9	Button	Button
12	String10	Data Display	データ表示
13	String11	Data Input	データ入力
14	String12	Date and Time Message Priority Group	Date and Time Message Priority Group
15	String13	Troubleshooter	トラブルシュータ

3) While selecting the head cell of the target range for pasting, execute the "Ctrl + v" keyboard shortcut to perform pasting.

Name	Resource ID	English (United States)	Japanese (Japan)		
String0	String0	Momentary Button	Momentary Button	Head	Ce
String1	String1	Momentary Button On	Momentary Button On		
String2	String2	START	START		
String3	String3	STOP	STOP		
String4	String4	RUN	RUN		
String5	String5	Machine Monitor	装置モニタ		
String6	String6	Setting	設定画面		
String7	String7	Gauge	ゲージ画面		
String8	String8	Alarm	アラーム画面		
String9	String9	Button	Button		
String10	String10	Data Display	データ表示		
String11	String11	Data Input	データ入力		
String12	String12	Date and Time Message Prior	Date and Time Message Prior		
String13	String13	Troubleshooter	トラブルシュータ		

(Beware that selecting "Paste" in the context menu will not paste correctly.)

2-2-4 Font Settings for Each Language

The font settings for text strings of objects are common across all the languages. You cannot therefore change font size or color between languages.

V	Appearance			You can specify these
v	Text (Default)	Machine Monitor		parameters for each
	Resource Link Type	Static	¢	language. If the text other than
	Resource ID	String5		default is not specified, the default setting is
	Japanese (Japan)	装置モニタ		displayed.
►	Font	Segoe UI, 50, Bold		
	HorizontalAlignment	Center	•	Common to all languages
	VerticalAlignment	Тор	•	
►	Margins (L,T,R,B)	2, 2, 2, 2		
	WordWrap			
	TextColor	White	•	
	BackgroundColor	Transparent	•	
	BorderColor	White	•	

2-3 Switching Among Multiple Languages

2-3-1 Setting Up the Startup Language

You can select the language that is displayed at the time of starting up the NA from among those added in [Language Settings].

1) Double-click [Configurations and Setup]-[HMI Settings] in the Multiview Explorer. [HMI Settings] appears on the Edit Pane.

2) Select the science is a language to be displayed upon startup under "Startup Language".

🍂 Language	e Settings	Control_Panel	HMI Settings	×	
Ę		evice Sett	ings		
	▼ Startup	Page			
TCP		Page name Co	ntrol_Panel		
711-	▼ Startup	Language	_		
	Start	up language En	glish (United States)		
FTP	▼ Softwar	e Keypads / USB	Keyboard		

3) When you start up the NA, the screen is displayed in the language selected in Step 2). In this guide, select "English (United States)".

2-3-2 Switching Among Multiple Languages

There are two procedures with which you can switch among multiple languages as described below.

1. Using the switch placed on the NA screen

2. Using a Visual Basic function (SetLanguage)

The following explains the procedure to change the language using the switch placed on the NA screen.

1.	Open [HMI]-[Pages]-[Control-panel]. Select [Buttons]-[Button] from [Toolbox] and drag and drop it to the page.	s: 0 \$ English (United States) ▼		h>
		tor	MD.	Button Momentary Button
			RB	Reset Button
			SB	Set Button
2.	Next, perform settings for the Properties. Click the [Properties] tab and set each parameter as below.			
	[Text(Default)] English [Font] Family:Segoe UI			

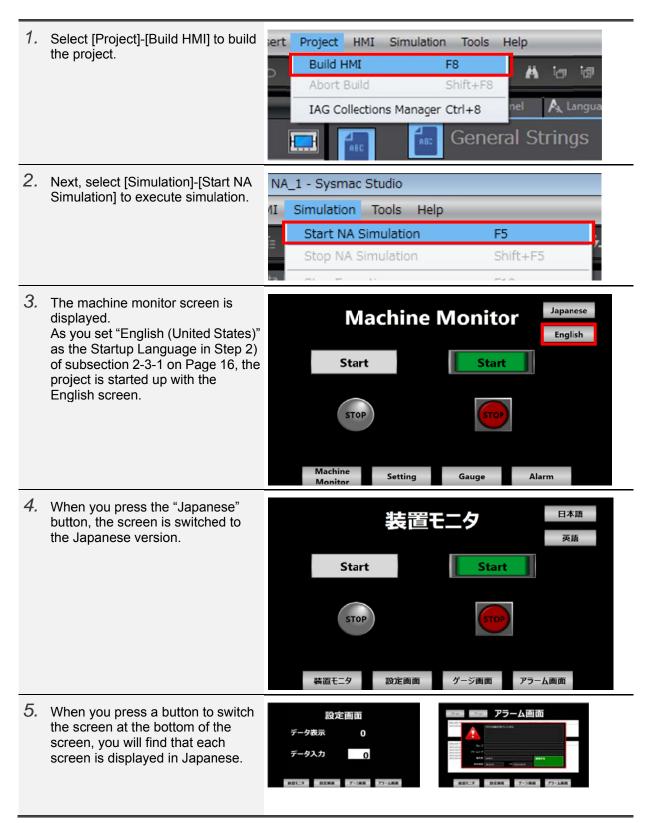

Size:20 Style:Bold

3.	Set the Button so that it changes the language when pressed down. Execute the "Ctrl + Shift +5" keyboard shortcut to display [Events and Actions], and perform the settings. Select "Click" as an Event and then "SetLanguage" from among those in Actions.	Events and Actions Button1 Events	Select Event to Add > Click BuzzerOff BuzzerOn BuzzerOneShot CallSubroutine ClearUserAlarmLog ClosePage DecreaseVariable EjectSDMemory EnableInputOperation IncreaseVariable InvertVariable Logout ResetVariable SaveScreenshot SaveUserAlarmLogToFile SetLInputFocus SetLInputPocus
4.	Select "English (United States)" as [Language], and check the checkbox of [Persist]. When you check the checkbox of [Persist], the setting is continued even after turning the power on or off to the NA, and the project thus starts up in English.	Events and Actions Button0 Events (0) Actions (0) Language Persist	<pre>< Select Event to Add > Click Select Action to Add > SetLanguage English (United States) </pre>
5.	Next, lay out the Button to switch the language to "Japanese". Copy and paste the "English" Button.	Enclish Enclish Ungroup Bring to Front Ering Forward Send Backward Send to Back Cut Cot Copy Copy	Conitor English English START
6.	Specify the properties. Click the [Properties] tab and perform settings as shown below. [Text(Default)] Japanese [Font] Family: Segoe UI Size: 20 Style: Bold	English Japanese	Type Button ▼ Appearance
